

# **DC** Fast Financials

Dynamics NAV

**Business Management That Grows With You**

**A first step into ERP with a solution that will grow with you. The must have for small companies and Start Ups**

**The Fast Financials solution for Dynamics NAV**

**Financial Management**

**Supply Chain**

**Business Tools**

**Implement only the basic financials that any company requires, but still buying into the Dynamics NAV package.**

**As you grow, open up the areas of NAV that you require.**

# Dynamics NAV 2015 functionality

## Implement just what you need...

Dynamics NAV is Microsoft's ERP solutions for small and medium sized companies. It is designed to provide solutions for every area of business and thus is a large platform of modules that can be implemented as required. The Fast Financials solution from Dynamics Consultants utilises the key areas of NAV required to give small companies everything they need to start using a business package. Unlike some systems aimed at small companies, this solution includes the licence for all of the NAV starter pack functionality so when your company grows you can expand your system to suit your needs.

### Financial Management

General Ledger  
Accounts Schedules  
Dimensions

Bank Management  
Bank Reconciliation

### Supply Chain Management

Receivables  
Sales Invoicing

Purchase Invoicing  
Purchase Order Management  
Purchase Line Discounting  
Purchase Line Pricing  
Inventory\*\*

### Other

Multiple Currencies  
Electronic Document Delivery

Electronic Document Storage

## Implementation

### Standardised for speed and to reduce cost...

Dynamics Consultants looks to provide a standardised implementation, with options for inventory, data set-up and training.

- DC Installation of NAV on the appropriate platforms (Azure or on premise)
- DC Setup of the DC Fast Financials NAV solution for a single company
- DC Training of key users in use of the NAV DC Fast Financials solution (if training option taken)
- DC Go-Live Support

\*\*Only available if "Inventory" option is taken

## Optional Items

### Inventory

If you are selling products then the Inventory option allows you to keep control of stock and pricing.

### Training

For the technically savvy you may wish to learn for yourself, however we recommend training on the use of your new system so that you can get the most out of NAV. This training package includes training for up to 4 key users.

### Data Migration

If you are moving from another system, or have a large amount of data, we provide an option for data migration, to include Static Data and Transactional Opening balances. This will utilise the Rapid Start Data Migration tools and include training and template tables for you to populate your database.

	Included	Excluded

Network Installation & Configuration		DC
NAV Server and Client Install	DC	
Hardware Installation & Configuration		DC
Set up of SQL Express & Configuration for use with NAV	DC	
Management of Customer Resources		DC
Database Backup set up	DC	

### Hosting options

#### On Premise or in the Cloud

Some companies have servers on site and are happy to host their NAV on premise and we are pleased to install NAV and SQL server Express on your site.

However, if this is not you, or you just want to remove the cost of buying and maintaining hardware, we can provide you with hosting on Microsoft's secure cloud servers, Windows Azure. Leading the way on security and privacy, this option provides a cheap and easy way to host your business software.

Dynamics Consultants is a Microsoft Certified Partner, specialising in enterprise resource planning (ERP) implementation, support and development services for Microsoft Dynamics® NAV.

We have a combined experience of over 120 years for Dynamics NAV, including integration, development, training, support and upgrades.

As well as NAV, we specialise in a range of business software projects, including Office 365, SharePoint, eCommerce and website integration and app development.
